ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.*

WO 2004/035080 A1

(54) Title: TREATMENT OF HYPERSENSITIVITY CONDITIONS

(57) Abstract: This invention relates to methods of treatment of hypersensitivity conditions such as asthma and other allergic con-
ditions, and especially to treatment of these conditions with cyclic peptidic and peptidomimetic compounds which have the ability
to modulate the activity of G protein-coupled receptors. The compounds preferably act as antagonists of the C5a receptor, and are
active against C5a receptors on polymorphonuclear leukocytes and macrophages. Particularly preferred compounds for use in the
methods of the invention are disclosed.
